Please find below and/or attached an Office communication concerning this application or proceeding.

		Application	Application No.		Applicant(s)				
	•	10/635,664		CHRISTIE ET AL.	Ø.				
	Office Action Summary	Examiner		Art Unit					
		AJIT G. PAT		2664					
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply									
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2664

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-3,6-13,16-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1,3-5,9-10,12-14,18 of U.S. Patent No. 6,639,912. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are broader than the patented claims. The following are the comparison between the claims in the instant applications and in the patent.

Regarding claim 1, the step of receiving the signaling is the same as the step of receiving a call setup; the step of processing the called number is the same as the step of processing the called number; the step of receiving a number portability is the same as receiving a response message responsive to the query that includes number portability information; the step of processing the route number is the same as step of processing the number portability information to select an identifier for routing; the step

Application/Control Number: 10/635,664

Art Unit: 2664

of transmitting a control message is the same as the step of transmitting a control message and the step of transferring the packet communications.

Regarding claim 2, the signaling message comprises a signaling system seven message is the same as the call setup message comprises signaling system #7 signaling recited in claim 3.

Regarding claim 3, the recitation of the signaling message comprises an integrated services digital network message would have been obvious to one skilled in the art since using the D channel in ISDN is well known in the art.

Regarding claim 6, the recitation of the number portability query and the number portability response comprise signaling system seven message is the same as the limitation recited in claims 1 and 3.

Regarding claim 7, the recitation of the step of processing the signaling message to select echo cancellation for the call is the same as recited in claim 9.

Regarding claim 8, the recitation "the identifier comprises an asynchronous transfer mode virtual identifier" is the same as recited in claim 5.

Regarding claim 9, the recitation of receiving the user communication over a DS0 connection is well known in the art.

Regarding claim 10, the signaling processor is external to the switching matrix well known in the art.

Regarding claims 11-13, 16-20, the same rejection is applicable since the claims are apparatus claims.

Art Unit: 2664

3. Claims 4,5,14,15 are objected to as being dependent upon a rejected base claim,

but would be allowable if rewritten in independent form including all of the limitations of

the base claim and any intervening claims.

4. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to AJIT G. PATEL whose telephone number is 571-272-

3140. The examiner can normally be reached on MONDAY-THURSDAY.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Wellington Chin can be reached on 571-272-3134. The fax phone number

for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
